

HOW TO SEND A TELEPATHIC MESSAGE

Spiritual telepathy usually happens spontaneously as an etheric transmission in the unified field of resonant thought. You can, however, send intentional thought waves to an intended receiver. The following is a sequence that can be used.

SENDING TELEPATHY ~ 9 SIMPLE STEPS

1. Clarify your intention for the transference.
2. Establish deep attunement with your Greater Self aka Divine Mind.
3. Invoke divine intervening assistance as the sustaining power behind your message. Qualify that the impression is made only according to the highest good of the receiver.
4. Come into a space of love for the person or group that will receive the impression.
5. Merge deeply into your auric field and the etheric layer. Place your consciousness into the same etheric energy layer of your intended receiver.
6. Focus your energy and then produce a strong etheric wave of thought vibration. Project the telepathic suggestion to the receiver for a few minutes.
7. Visualize the telepathic transfer being successfully impressed upon the receiver.
8. Close with prayer and invocation and release yourself from the energy circuit.
9. Give gratitude and appreciation to your Creator for this activity.
