The Emerging Consciousness of a new Humanity

The following gives definition to the new consciousness that is emerging upon our planet and some of its prominent qualifying characteristics.

Divine Relationship

We are self-realized as Divine Presence, merged wholly and completely with this eternal awareness and infinite source.

We consciously live our eternal unity with the Divine Presence, first and foremost. We have complete and unwavering reliance upon this innate divine nature and nothing else.

We realize the truth of the one existence and consciously embody this one consciousness and its purpose.

This one consciousness is the center point through which every thought and act is conceived.

We are devoted to the Divine templed within our own Self and in all other beings. We love thy neighbor as thyself.

It is our highest privilege to love and serve all manifestations of life.

Divine Will

We humbly realize that “of ourselves we can do nothing, it is the Divine Presence within that does the works”. Our personal will is completely surrendered to Divine Will.

We live the life of divinity and see the perfection of divinity in everything.

The Divine Presence is the pure mirror of our thought energy. We live by the Golden Rule; do unto others as you would have them do to you.
We cultivate the garden of goodwill in the hearts and minds of all humanity, catalyzing a global reorientation towards the greater good of all.

**Transfiguration**

Our attention is completely focused upon the realization of our oneness with humanity. This is our sole purpose for being.

Our emotions and mental activity are controlled. We have freed ourselves from all attaching hold to personal and material identity.

We are a transparent lens of Divine Truth, free from the dualistic influences of attraction and aversion.

We perceive beyond the form, beyond duality and beyond the window of the body-bound senses. Concepts of belief are transcended.

We serve as a bridge between the matrices of consciousness, between the form and the formless.

We are neutralizing pillars of pure divinity, in this world but not of it.

**Renunciation**

Our life is sincerely renounced to the interest of the larger whole.

Our focus of identity is with the Greater Self, which is the guiding entity.

We realize the Self as an eternal and limitless being.

We serve as hollow instruments, free of personality entrapment and any attachment to the material plane.

We are utterly surrendered to the Greater Self, offering ourselves wholly and completely to the Divine Presence.

We are the pure awareness, the reality that exists behind all creation, that which transcends all human created labels and categorizations.

We impeccably seek truth at all times in order to serve the Divine Plan.

We walk the way of grace, focused upon the spirit of goodwill towards all life.
Divine Intuition

We are functioning from the plane of Divine Intuition as an intelligently focused expression of Divine Love in action.

We recognize the one true reality that exists within all things. We do not accept any form of incoming responses that emanate from separated awareness.

Our interiorized mind vibrates above the senses and perceives from a state of mental calmness.

As a clear channel, we receive illumined direction. From this guidance, we wield knowledge and light.

Knowing true compassion, we do the greatest good for the largest number of people.

We magnetize and draw forth the physical manifestation of the Divine Plan at the human level. We experience ourselves as an immortal indwelling consciousness, one with Source.

Through the power of the collective Divine Intuition, in union with universal light, we initiate the worldwide movement of goodwill and ultimately bring forth the era of planetary peace.

From our mantle of compassion, we respond in full force to the need for global harmonization and for the dissemination of Divine Understanding.

We humbly enter into global relations with the simple people of goodwill, stimulating the heart responsiveness and receptivity to this greater love.

We are the bridge that anchors love’s magnetic cohesion between all levels of consciousness.

The purity of our love gives constantly as its inherent nature, requiring nothing back in return.

Divine Love

We realize the Self as a vibrant and powerful center of fundamental, universal love and blessed with an expanded capacity to serve the human race.

As a potent, collective expression of Divine Love in action, we give our all to the expression of this greater love upon the planet.

Through us, Divine Love wields its cohesive power, leading and sustaining everything into integration, unity and inclusiveness.

Through love’s wisdom and our mantle of compassion, we respond in full force to the need for global harmonization and for the dissemination of Divine Understanding.
We humbly enter into global relations with the simple people of goodwill, stimulating the heart responsiveness and receptivity to this greater love.

We are the bridge that anchors love’s magnetic cohesion between all levels of consciousness.

The purity of our love gives constantly as its inherent nature, requiring nothing back in return.

**Divine Wisdom**

We demonstrate true wisdom through the intelligent application of love to all of life’s activities.

From an intelligent knowledge-based expression, we can vision far beyond the realms of mass human perception.

The presence of pure wisdom supersedes our intellect through our finely tuned sensitivity and intuition. We live our life through the higher mental faculties.

We are conscious knowers and co-creators with the Divine Plan. Intuition and synchronicity are our most influential guides.

We easily recognize the difference between the real and the unreal.

We recognize the Divine Presence as the one point from where all success originates and where all success emanates.

We know the Self and the Divine Presence as one. All of our great works are accomplished instantly.

We command the truth. We only see perfection.

We already have all that we need within our own powerful being.

**Equanimity**

We live our lives solely from unchanging pure awareness of the vaster Self. We are completely aware of the one consciousness at play in the weavings of our daily life. We “see” the world for what it is – a learning ground for consciousness.

As agents of Equanimity, we choose to silently accept all as the perfect unfoldment of the Divine Plan.

Our attitude is absolutely neutral towards everything that is regarded as the illusory self and the temporary world.

We operate through sincere detachment.
Neutrality is our way of life. With an attitude of indifference, we are unattached to outcomes and focus only upon the task at hand.

We are not for or against anything. We accept everything just as it is while offering sincere love and compassion to all.

We offer opinions only when asked, foregoing the need to interpret another’s situation from a genuine attitude of non-interference and the refusal to criticize.

We are living with an attitude of harmlessness towards all life. We have authentically entered into the “peace that passeth understanding”. We live in a state of natural great peace.

We seek no acknowledgement or recognition for the self of any kind.

We create our future from the eternal Now.

**Soul Union**

We are in direct connection with our Source through a “divine personality”.

Our new personality and the Divine Presence stand together in perfect alignment.

We are solely focused in Unity Consciousness. Our form serves as an instrument through which the group consciousness is functioning.

We serve as a fully conscious Divine-Human in full control and with unwavering self-mastery.

We are working from the frequency of Unity Consciousness through the faculties of Divine Intuition and active intelligence.

We know ourselves to be pure consciousness, experiencing life in a human body while radiating a force of light that greatly affects every person we meet.

We have grasped the immensity of the Divine Plan and its purpose as it concerns the planetary evolution.

**Co-Creation**

We know that there is no greater power than the Divine Presence within us.

We manifest instantly on the physical plane through thought and feeling alone.

We realize all is accomplished here and now, as soon as the thought arises.
Everything we think of, in the name of the Divine, produces a vibration that coheres our energy. This includes all supply, manifestations and co-creations in service to the evolutionary plan.

We are always in perfect harmony with the Divine Principle. From this place, we co-create effortlessly. We are co-creators in connection with the Unified Field.

We see and know the living elemental forces in nature. Through intelligent cooperation, we work and cooperate with them for the purposes of the Divine Plan.

We allow the guidance and truth streaming forth from the Unified Field (versus linear reality) to permeate our consciousness.

As Self-Realized beings, we inherently know how to project divine light instantly into any desired creation, yielding immediate results.

We can wield the power to transform instantaneously.

**Generosity**

The Law of Generosity is one of the main governing laws of our emerging new reality. We know that charity to all life is the fulfillment of Divine Will on Earth.

The will to serve keeps the life current flowing through the illumined Self.

Every activity, including our thoughts, feelings, words and acts, is centered upon service and giving.

We command the manifesting energy of love-wisdom into immediate, charitable action for the greater good of the whole.

As we express selfless generosity, we release creation’s unlimited storehouse of supply.

The purity of our greater love gives constantly as its inherent nature, requiring nothing back in return.

We know that it is through the act of giving that we shall receive.

We stand as one in group formation, working together in self-forgetfulness.

We give no thought to the magnitude of our accomplishments and bear no preconceived ideas as to our own value or usefulness.

Our attitude is to live and to serve, asking nothing for ourselves and needing no reward. The act of giving IS the reward.

As an instrument of divinity, we love as God loves. We give and keep on giving.
All acts of service are expressed in an effort to magnify the glory of the Divine Presence, brought forth through a sincere attitude of love and goodwill towards all life.

Through charitable acts of service, we experience the manifestation of the one universal family of love, everyone helping to meet the needs of all others.

Supreme kindness and charitable action is our natural way of life, as we stand united in our heart-realized power.

**Emergence**

Our Soul is completely absorbed back to Source. Our purified human personality and the innate divine nature are fused as one unified being.

We demonstrate a total absence of any response to the pull of matter. We have resurrected ourselves out of matter and into a spiritualized and greatly expanded conscious awareness.

We live from the Absolute Reality while continuing to serve the fulfillment of the highest potential of all humanity and the new emerging race.

Our awareness is completely focused in the group consciousness.

We are not capable of having negative thoughts and all energy streaming from Source is consistently divinely qualified.

We are liberated from the illusion of duality and the law of karma.

As an enlightened group consciousness, our one united front is a massive and influential force field affecting the whole of the planet and helping to raise the entire race into Unity Consciousness.

We can co-create as the masters of wisdom and use the entire field of group energy for the highest good of humanity and the planetary evolution.
